SCHOOL AND DISTRICT PROPOSAL

Bringing Warmelan to your school

Connect classroom records with practical support at home.

What participating classrooms can do

Teachers record attendance, prepare schoolwork and choose which quiz results to release. Students can follow their own progress. Linked families can check shared attendance and released results for their child, subject to the student's sharing choices.

A suggested first step

Choose a teacher and section, set up the class, and link participating families. Use one attendance sheet and one released quiz as the first walkthrough. Review the teacher, student and family views together before adding classes.

Proposed annual pricing

₱1,000 per participating student

Teachers and parents have free access. For 500 participating students, the proposed budget is ₱500,000 per year. For a district quote, use the actual number of participating students in that district.
